

Kleen-Coalesce

Produced water polishing technology capable of removing oil droplets down to 5 micron from produced water. Automated oil recover system minimizing water in oil returns. High flux rates maximizing flow in a small footprint. Small light weight elements for easy installation.

Rate: 14 BPM

Max. Pressure:
150 PSIG @ 250 F

Tare Weight: 16,000 Estimated

Operating Weight (1.2 SG):
29,800 Estimated

Dimensions: 16'0" x 8'0" x 11'6"

Deck Load: 233 PSF

Quantity: 42

Oil Removal:
5 μ m oil droplet removal

Filter Type: Canister

Specification:
ASME Code Vessels

Overpressure Protection:
PSVs (Sized for Fire Case)
